Genius innovation leaves behind a legacy...

PS Code: PY5

Problem Statement:

PAY ROLL SOFTWARE

Solution

Describe your idea/Solution/Prototype here

- Payroll software is a tool used by business to manage employee compensation
- Payroll software also calculates and withholds deductions such as taxes, insurance and expenses etc...
- By automating calculations, payroll software reduces the risk of human error in payroll processing and error-free payroll management system
- This may include encryption of data, access controls to restrict whom can view or modify payroll information and regular data backups to prevent loss of data

Technology Stack

Technology Stack Used

- python
- Java script
- Html
- CSS
